

NWDG CORING KIT CHECKLIST (V1 - June 2010)

This NWDG coring kit checklist is designed to allow hirers to know what is in the kit, and for Colin Edwards to confirm the contents and condition of the kit on hiring the kit out and on its return. The facility for CE and the hirer to sign off the agreed outward checklist is provided. On return of the kit, CE will check the kit again and sign, and if necessary, make notes regarding any losses or damage (see hire agreement for implications). The completed checklist will be retained by CE along with the hire form. The hirer may request a copy from CE.

ITEM	TICK when kit hired out	Note of any damage at start of hire	TICK when kit returned	Note any damage at end of hire
